

# 4TH GRADE NEWS

## February 2019

### *What are we learning this month?*

**ELA:** In our new unit we are learning all about infographics. We will be learning all about the components of infographics so that we can create our own infographic. We will research a topic and then present what we learned on an infographic.

**Math:**

**5A:** Students will extend their understanding of the number system beyond whole numbers, decimals, and fractions to rational numbers, including applications using number lines and the coordinate plane. Students use different representations for linear relationships including equations, tables of values, and graphs.

**5B:** Students will use models, drawings, and strategies based on place value to divide whole numbers and decimals.

**Social Studies:** Students are working on the Becoming Banneker unit. In this unit, we will investigate the effects of gravity, analyze the apparent movement and brightness of the sun and stars, and examine the visibility of celestial bodies throughout the year. Along the way, they will meet Mr. Banneker and discover how he was able to use the stars to determine location and time.

## **Dates to Remember**

**2/4- Friendly's Spirit Night**

**2/7- Report Cards**

**2/18- No School-President's Day**
